

NOTARIS

Notaris labelers are available for just about any application including wrap-around, panel, multi-panel, and multi-head (top, bottom, front, back, & side).

Supplied with a PLC, the Notaris labeler is affordable and comes equipped with a durable and reliable label applicator head. Operating at speeds up to 100 feet per minute for containers up to 6 inches tall.

An upstream sensor detects the presence of containers to automatically start the labeler, indexing containers into the labeler. An inductive sensor, requiring no adjustment or cleaning, at the label applicator detects the presence of labels and indexes to apply the label precisely to the container. Optional sensors are available for low web and broken web.

AFFORDABLE LABELER FOR A BROAD RANGE OF APPLICATIONS

Complete Labeling Solution
with Notaris Labeler and Infeed & Outfeed Turntables

The labeler comes standard with seven feet of conveyor, drive and idler, wrap belt, stainless steel stand and a stainless steel swivel control panel that is easily adjusted to a convenient position for the operator. Many options are available to tailor the labeler to your specific requirements including a color touchscreen, longer conveyor lengths, and inspection.
