COMPLETE LINE SOLUTIONS

BellatRx provides end-to-end solutions customized to your complete cannabis packaging needs. We design and manufacture fully automated packaging lines for a variety of products including dry flower, vapes, concentrates and edibles. Our line solutions cover a wide range from bottle unscrambler, weigher, filler, capper, torquer to printer and labeler. We also integrate your secondary packaging solutions.

We successfully developed and installed several fully automatic weighing and filling systems for packaging Cannabis flower.

CANNABIS WEIGHT FILLING

Integrate combination-scale equipment into your complete packaging line to fill cannabis flower into jars, bottles, and containers. Eliminate the labour intensive manual weighing of your cannabis product to achieve the desired accuracy.

OILS - TINCTURES - DROPS - SPRAYS

At BellatRx we have you covered no matter the application. If you are looking for packaging solutions for your cannabis extracts and concentrates, our Monobloc liquid filling systems are excellent and unique solutions to fill, plug, cap and torque your CBD oils, tinctures, drops and sprays in a single small footprint.

Highly accurate and reliable, our line of Monoblocs is considered the gold standard in the industry.

AQUARIUS MONOBLOC

Aquarius Monobloc is a Fill-Plug-Cap-Torque system designed for cannabis liquid filling applications.

It is equipped with servo-powered starwheel and fits in a small footprint of less than 80 sq. ft.

Aquarius can fill liquids at speed from 40 to 110 cpm with single or double index versions.

HYDRA MONOBLOC

Semi-Automatic & Automatic versions available.

Ideal for smaller production runs of < 5,000 units/day.

Ease of maintenance & changeovers.

Economically priced to fit entry level small batch operations.

ISOLATE - KIEF - HEMP POWDER

Cannabis and CBD powder filling is challenging as it requires high precision and accuracy in weighing and dispensing.

We offer customized powder weighing and filling systems which give you the highest accuracy in the industry.

Our semi-automatic monobloc is a great solution for filling isolate, kief and hemp powders as it has been designed specifically for filling of small bottles or samples.

AUGER FILLER

With BellatRx's single or dual head Auger Fillers you can fill virtually any rigid container at speeds up to 60 cpm or 90 cpm with one or two heads.

A bench-top version is also available which is a great solution if you are looking for a semi-automatic and more compact system. It can be integrated with a powder weighing system for accurate filling.

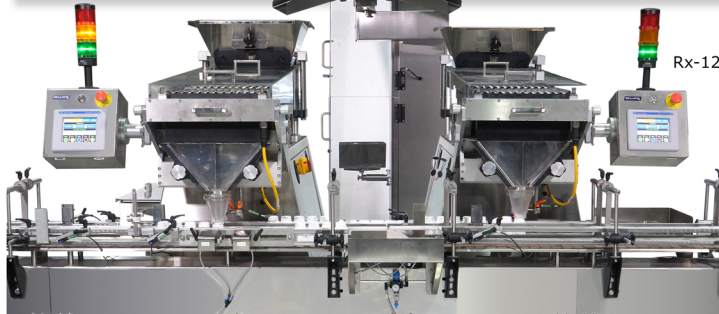

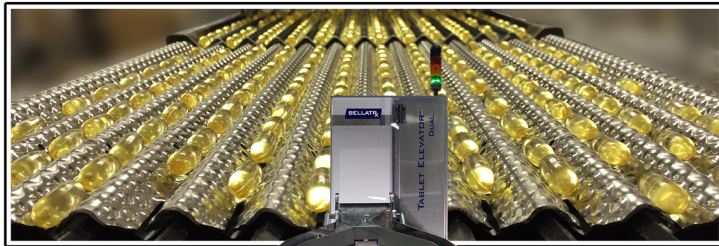

CAPSULES - SOFT GELS

Our tablet counters have been trusted in the Pharmaceutical market for over a decade.

Our Rx-12 is a solid dose product count system that combines high speed, with full flexibility of an electronic counter in a small footprint.

Fast, accurate and reliable, our solid dose counting system can be used as a stand-alone unit or added to an existing or new cannabis packaging line.

RX-12 & RX-FILL PLUS

Rx-Fill Plus

Rx-Fill PLUS is an accurate solid dose counter that can count in manual, semi-automatic, and automatic modes and can be mounted on a tabletop or on a fully automated packaging line.

Our counting, filling, and weighing solutions are a perfect match for handling your capsules, softgels and mints.

Tried, tested, and true in the pharmaceutical industry, our products fit the Cannabis market with ease.

CARTRIDGES - PENS - PODS

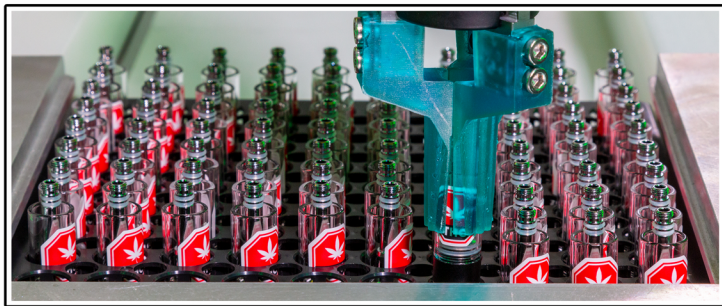

Cannabis oil and distillate processing requires accurate fill volume or weight control, and no product loss at the end of a batch.

BellatRx's Constellation Monobloc is a new servo-driven fill-weigh-cap system for filling and capping of cannabis distillate into vape cartridges and pens.

A fully integrated system would allow you to introduce cartridges, mouthpieces, and resin to the system, and let the Constellation do the work of feeding, pre-weighing, filling, post-weighing, capping, torquing, inspecting, labeling, and unloading of cartridges or pods.

What really sets the Constellation apart is its dual-weight control before and after filling. The system measures a tare weight and gross weight, subtracting the tare to obtain an accurate net weight as a 100% verification of the fill volume.

Alternatively, the system is quite modular and allows you to expand the level of automation one module at a time to match your investment with your production volumes.

CONSTELLATION MONOBLOC

BEVERAGES - SHOTS

Delivering the best quality THC and CBD-infused drinks is quite challenging. Efficient and reliable packaging of these products requires high precisions.

It pays to use BellatRx brand when investing in filling and packaging equipment that is suitable for CBD-infused beverages. Our fully automatic solutions include in-line or rotary filling systems with peristaltic or volumetric filling technology with high accuracy.

INLINE FILLER

Our Inline fillers deliver accurate fills and can handle many different viscosities. A perfect solution for CBD infused shots/beverage formats.

Available with 2-16 filling nozzles, our Inline fillers are complemented perfectly by our bottle unscrambling & capping equipment.

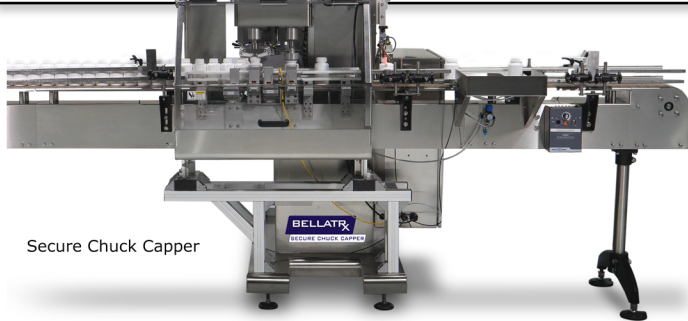

GUMMIES, SOFT CHEWS, CHOCOLATES

Cannabis edibles can be made into any texture, shape, and size.

Gummies, soft chews, and chocolates can be weighed or counted for precise packaged amount by integrating a combination scale or a counter to the packaging line.

A Secure Chuck Capper can apply and torque challenging Child Resistant caps with accuracy and repeatability.

Secure Chuck Capper

SECURE CHUCK & SECURE STAR CAPPERS

Secure Star Capper

Our cappers & filling/weighing or counting solutions are a perfect match for handling your softgels and edibles.

Proven in the food industry, our products fit the Cannabis market easily. Small or large formats, we have you covered.

ORAL SPRAYS

CPC HIGH-SPEED CAPPER

Hailed as a simple and innovative design, our CPC High-Speed Capper is made for closing caps with pump stems and is an ideal packaging solution for Cannabis oral sprays and lotions.

Pump Stem Unscrambling & feeding, dual placement stations, container neck centering device and cap inspection are just some of the features your packaging operation will benefit from.

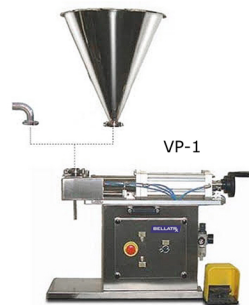

LOTIONS - CREAMS - RESINS

VP-1 S & VP-1 PISTON FILLERS

The BellatRx VP-1S and VP-1 (Benchtop Version) are economical solutions for filling topical and creams.

Filling ranges from 10ml-1000ml, or 2500ml to 5000ml as well as manual volume adjustment and scale.

SL FAMILY OF BANDERS

Some Cannabis products need to be labeled using decorative shrink sleeves. Tamper evident shrink bands are a secure, highly effective way of meeting strict packaging requirements for the retail distribution of cannabis products.

The SL family of BellatRx banders is available in several models for neck and full body bands using shrinkable band materials. Offering exceptional value, our banders are easy to set up and use.

NOTARIS LABELER

One of the most important aspects of your Cannabis operation is the accurate and repeatable application of **Excise Stamp**, as well as **Product, Warning, and Tamper Evident Labels**. Traceability is also extremely important and is paramount to complying with Federal, State and Provincial regulations.

BellatRx offers a full suite of solutions that allow for these processes to be completed during the primary labeling process, eliminating secondary or manual application. Our Notaris labelers can ensure this happens consistently and accurately across large batch run.

The logo for BellatRx, featuring the brand name in a white, bold, sans-serif font. The 'X' is stylized with a horizontal line through its middle. The text is contained within a dark blue, rounded rectangular shape that has a slight 3D effect with a shadow on the right side.
