

May 2022

Complete Packaging Line Integration - Whiskey Jars

Production line integration is an essential factor in productivity. When done well, it positively impacts efficiency and waste control.

One of our latest projects is a [Packaging Line Integration](#) for automated bottling systems for liqueurs and spirits. The bottling line includes filling, rinsing, capping, labeling, printing, and bundling machines in this specific project.

Watch the video that shows the details of all the stations and their main features.

Upcoming In-Person Shows

From June 1st to 3rd, the BellatRx team will be in Toronto at the O'Cannabiz Expo - **Booth 247**.

You will have the opportunity to talk to our experts in the packaging industry and discuss your Cannabis packaging needs. We will exhibit the Secure Star Capper, Rx-Fill Plus, and VP-1S - the machines that led us to be nominated for "Best Packaging Equipment."

We are happy to come back to Mexico City for the Expo Pack Mexico 2022.

In this edition, we will present the Rx-Fill Plus table counter, and Aquarius Monobloc, a compact and complete solution for liquid filling, plugging, capping, and torquing.

Visit us at **Booth 1714** to learn more about the solutions we offer for the Latin-American market.
