FULLY INTEGRATED LIQUID FILLING LINE - SPIRITS - WHISKEY

Building a production line is challenging. All the search to find the vendors that better meet your requirements, and how to integrate all solutions in the best cost-effective way is time-consuming, and most businesses don't have an internal team dedicated to such a project.

Our Line Integration Service solves this problem by supporting the customers and mitigating the risk and challenges associated with managing multiple vendors.

The video below shows one of our line integrations that mix BellatRx machines and other equipment to deliver a full line capable of filling, capping, rinsing, Capsule Inserting, bottle orientation, labeling, and Printing. Everything is connected through conveyors and accumulation systems.

CLIENT TESTIMONIAL - AFTERMARKET SUPPORT "BEYOND EXPECTATIONS"

Our service team at the customer plant in South Carolina while setting up a complete liquid packaging line for personal care products.

At BellatRx we work hard to provide the best equipment and service to our customers. Our customers' feedback is the fuel that makes us keep seeking the best services and technology in our offers.

"I would like to thank you, Lynel and Mike again for the terrific service you've provided, and look forward to future business with BellatRx." Isaac Yancey

MEET US AT PACK EXPO INTERNATIONAL - Booths S1673 & W18032

If you are attending the event, you can meet BellatRx applications specialists in two different booths. Booth S-18032 in the Pharma Pavilion, where we will display an Aquarius Monobloc Filling & Capping Machine, Rx 12 Tablet Counter with Vision System, and a Tablet Elevator. At booth S-1637 located in the south hall, we will exhibit Secure Chuck Capper, Notaris Wrap Labeler, Aquarius Monobloc, Taurus Bottle Unscrambler, Magna Capper, VP-1S Piston Filler, and Rx- Fill Plus Tablet Counter.

Check our website's [full list](#) of events and register for the one closest to you. Don't miss the opportunity to meet us in person and see our solutions in motion.
