

December 2022

## RETROSPECTIVE 2022

We are in the last weeks of 2022, and we have a lot to celebrate. It was a great year for us, not only because it marked our 20th anniversary, but also because we've accomplished many great projects that we would like to share with you.

This year our internal events had an extra special touch to mark the occasion. We used this opportunities to recognize the hard work of people who have been working with us through the growth path. It was an excellent opportunity to welcome new employees and integrate them to the team.

It's always nice to receive gifts. And it has a special taste when it is a recognition of the hard work and a great milestone.

Special thanks to the PMMI team for a beautiful plaque recognizing BellatRx relevance in the packaging industry. We share with all BellatRx employees the merit for this prize.

## EVENTS & SHOWS 2022

**We had four successful in person trade shows and two live presentations at Virtual Pharma Expo.**

- Pack Expo East - Philly
- Achema - Frankfurt
- Expo Pack - Mexico City
- Pack Expo Intl. - Chicago

Last weekend we received a visit from Santa who came to see our packaging solutions and the new technologies we apply to our machines.

He took some time to interact with our employees' kids and bring joy in this festive time.

We thank our Social Committee for organizing another great event for BellatRx's employees and their families.

## NOTARIS PLUS

### An Evolution in Labeling Automation

#### Bridging the Skills Gap with **FULLY AUTOMATED** Labeling Solutions

BellatRx is introducing the **Notaris PLUS** as the backbone to labeling automation in today's labor reality. This is an upgraded and smarter version of our regular labeler which is technologically more advanced. It has been designed with an operator interface that's very simple and easy to understand. Notaris Plus is the original all-servo 100% totally speed synchronized labeling machine with the most innovative ultra-fast recipe changeover system around. To offload most of the maintenance issues, BellatRx is providing intuitive HMI's, and visual learning components, as well as augmented reality (AR) and remote management.

- Super easy setup and recipe creation
- Siko Indicators with arrows pointing to the direction for adjustments
- White LED strip lights to notify operator for an issue with any assembly
- Portable hand-held tablet to setup and watch videos from anywhere around the machine

We are thankful for the year that ends and excited to share more news and machine improvements with our partners and customers in the coming year.

**We wish you a great holiday and a prosperous new year!**

BellatRx Team.
